Benefit for high cylinder group

High Cylinder Lens

CONTENT

The left side of the slide features a blue background with a grid of white lines. A 3D, metallic-looking lens is positioned diagonally across the center. The word "CONTENT" is written in large, bold, black capital letters across the middle of the lens.

01

Clear and comfortable vision quality

02

High cylinder patients' fast channel

03

Various choice of refractive index and diameter

04

Various choice of function combination

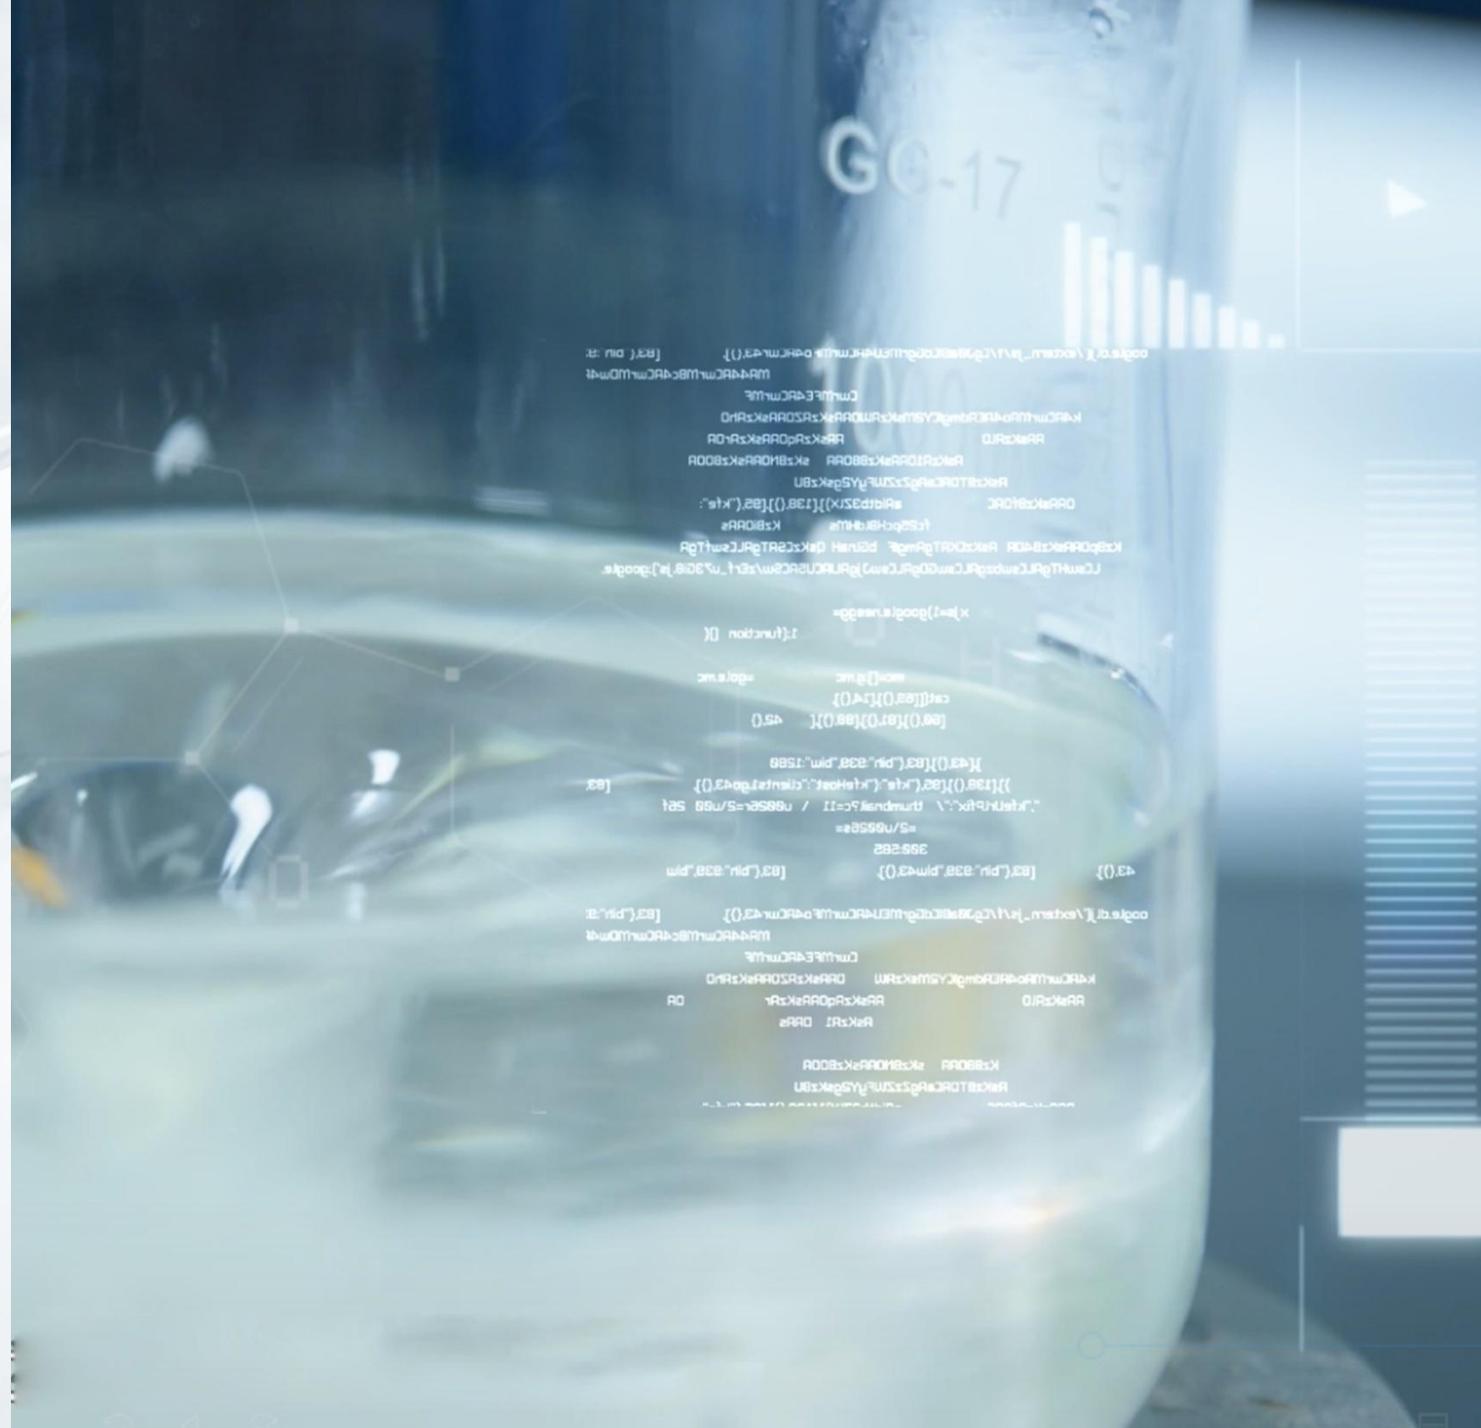

Clear and comfortable
vision quality

Advanced mold research and development craft

High cylinder mold is produced independently by Conant. The parameter like lens base bending is highly matched, which is more suitable for high cylinder group.

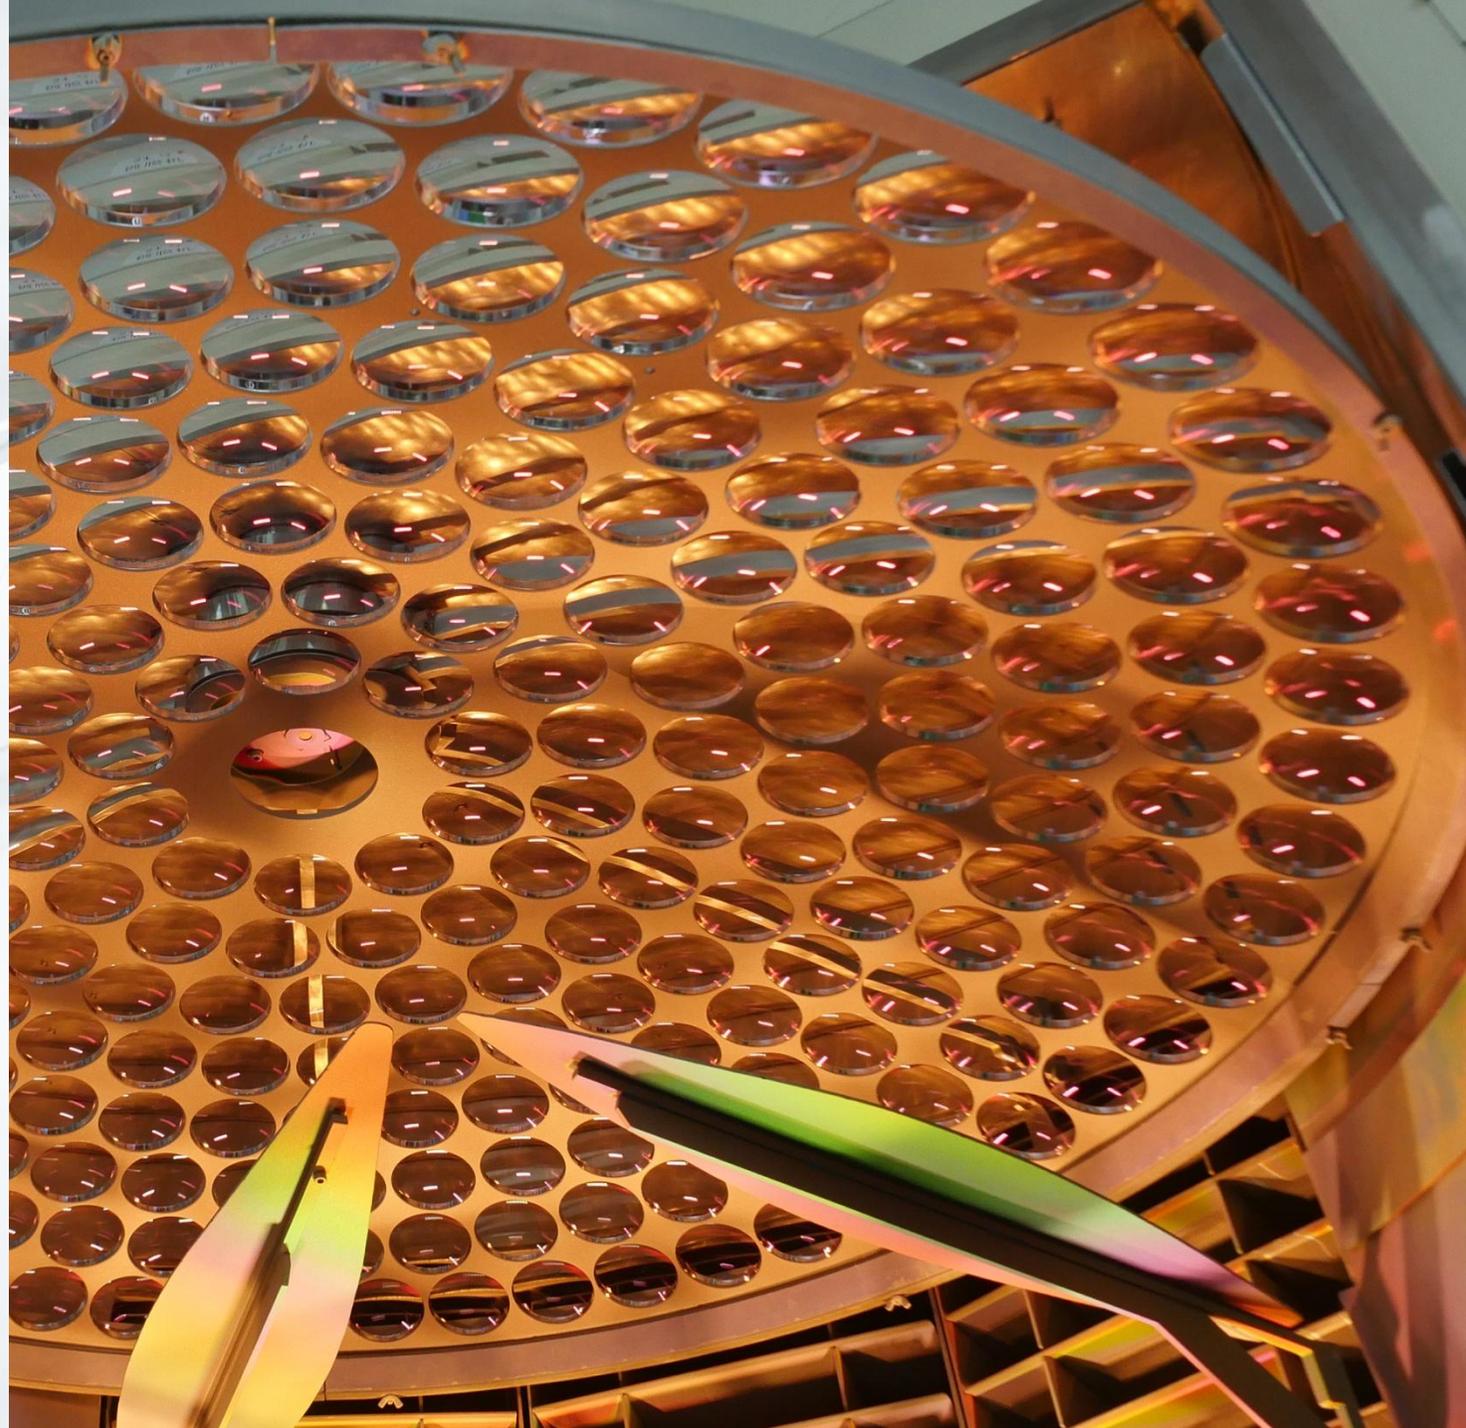

Clear and comfortable
vision quality

High-end ion coating craft

Adopt special coating craft, higher density of lens surface, better wearproof and transmitting performance.

Clear and comfortable
vision quality

Choose high quality raw material

Adopt Japan Mitsui raw material. The lens has better optical performance, wearing more comfortable.

High cylinder patients' fast channel

High cylinder group have higher demand for lens especially wearing for the first time. So they need to choose high cylinder lens which has more scientific optical performance.

High cylinder group need a long time to customize lens. Conant provides ready-made high cylinder lens, which shortens customers' cycle for getting lens.

It is more difficult for high cylinder group to choose lens, most of them will choose expensive customized lens.

Various choice of refractive index and diameter
