Product Performance

Radiation Protection

Radiation protection,relieve the pressure of using eyes

Hard coating

Hard coating to protect your glasses anytime

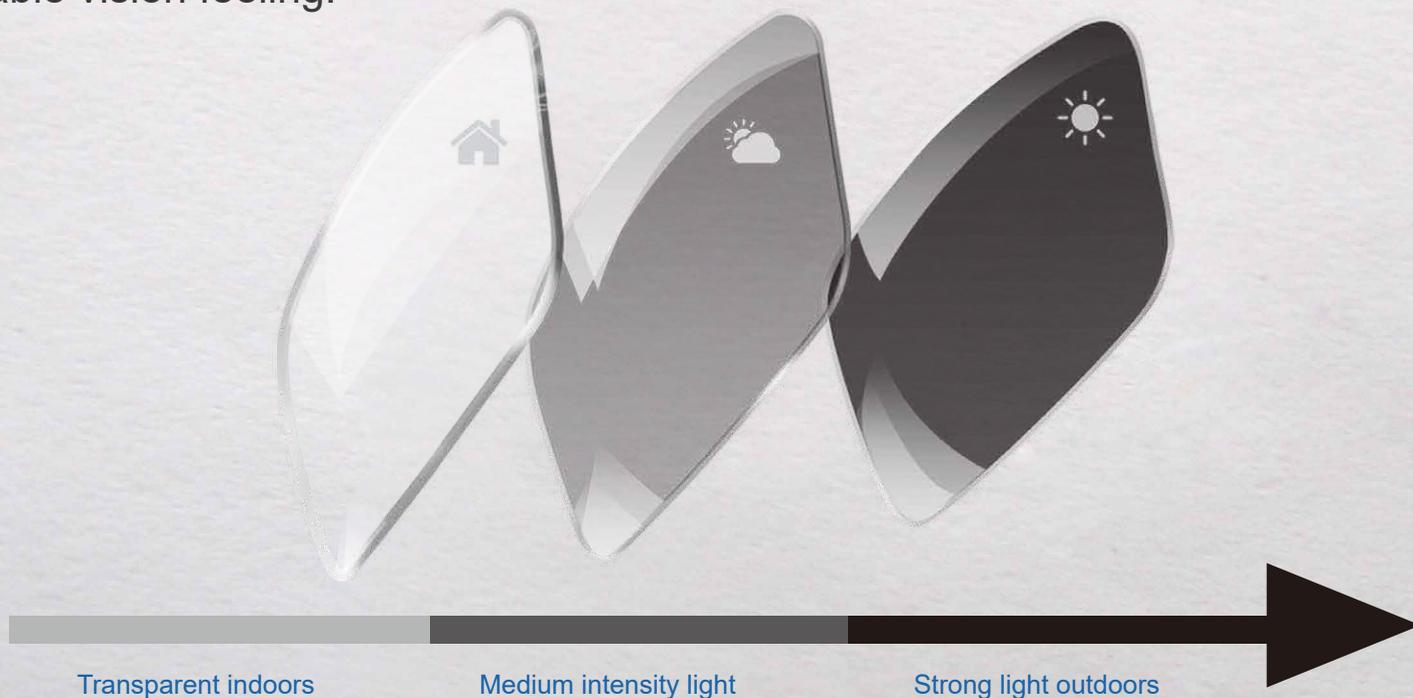

Anti-glare Protection

Cut off glare factor,clearer view, enrich vision experience

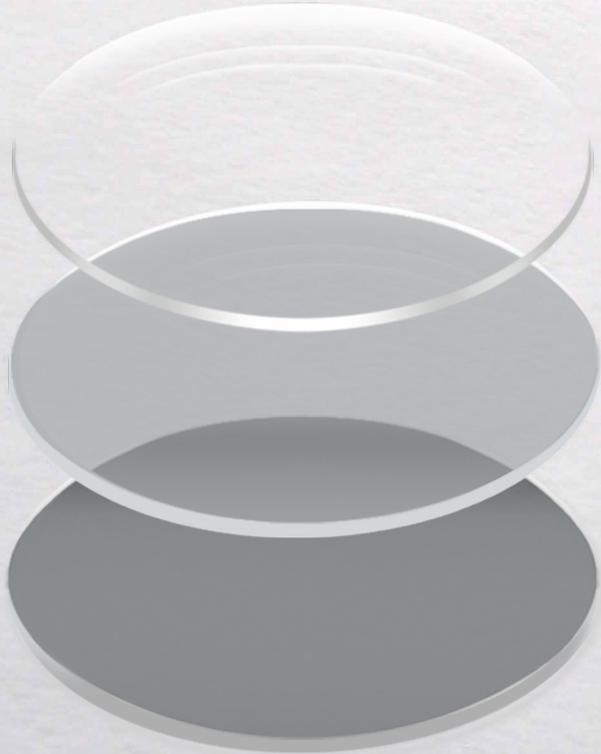

Intelligent sensitization, change color quickly

Adopt intelligent photochromic factor. The lens is clear, and changes color quickly and evenly. It combines the function of glasses and sunglasses. It can change color intelligently according to intensity of the light: transparent indoors and changes color quickly outdoors. Provide you more comfortable vision feeling.

Multiple function and coating protection

Hard and anti radiation coating

Quicker

Hard coating to cut off the damage of electromagnetic wave, reduce the damage of using eyes.

Intelligent and quick color change

Stabler

Intelligent photochromic factor, change color rapidly outdoor, fade to transparent indoor rapidly.

Relieve eyestrain

Clearer

Vision correction and reduce the tiredness, the stimulation of strong light and harmful light, relieve eyestrain.
