PHOTOCHROMIC Coating Lens

Change color deeper outdoor, fade to transparent indoor rapidly and evenly

Photochromic lens switch color rapidly and comfortably both indoors and outdoors. The lens changes color intelligently once exposed to sunlight, and fades to transparent rapidly once indoors, which lets you experience the best vision in any environment.

As well as traditional colors gray and brown, we also provide more choices of new fashion colors such as pink, purple, and blue. Show your style.

Available in a wide array of materials

Conant Sunfilter can be applied to virtually any lens material and the product range is vast. With so many possible materials, indexes, and treatment combinations, Conant photochromic lenses satisfy diverse customer demands.

All-weather protection, more peace of mind

Photochromic lenses can effectively block UVA and UVB, protecting your eyes from strong natural and artificial light, especially for those who are sensitive to light. No matter whether you are indoors or outdoors, it can make you feel comfortable.

It can give your eyes all-weather protection and let you enjoy every moment.

When Technology Meets Speed

- Using a new generation of coating photochromic technology, the color change and fading speeds are faster.
- Safety protection with excellent impact resistance
- Effectively block UVA and UVB to protect your eyes
- Multi-functional combination, UV++, D-FREE, Hi-Vex™, giving you more choices
- Full refractive index production, product range is broad.

Multiple scenes to wear
